

# Virtus Global Multi-Sector Income Fund Declares Distributions

HARTFORD, Conn., May 23, 2018 [/PRNewswire/](#) -- Virtus Global Multi-Sector Income Fund (NYSE: VGI) announced the following monthly distributions:

Amount of Distribution	Ex-Date	Record Date	Payable Date
\$0.126	June 8, 2018	June 11, 2018	June 18, 2018
\$0.126	July 11, 2018	July 12, 2018	July 19, 2018
\$0.126	August 10, 2018	August 13, 2018	August 20, 2018
\$0.126	September 13, 2018	September 14, 2018	September 21, 2018

This distribution represents a per annum distribution rate of approximately 10.36% based on the market price of the fund's shares of \$14.59 as of the close of the New York Stock Exchange on Tuesday, May 22, 2018 and approximately 10.44% based on the fund's net asset value (NAV) of \$14.48 as of the same date.

The fund's monthly distribution rate has been reduced by \$0.03 per share. The decrease in the fund's distribution rate is the result of several factors, including current market conditions, the impact of significant market volatility during the first quarter of 2018 on the fund's option strategy and management's desire to provide a distribution rate that it considers sustainable for the longer-term.

Under the terms of the fund's managed distribution plan, the fund will seek to maintain a consistent distribution level that may be paid in part or in full from net investment income and realized capital gains, or a combination thereof. Shareholders should note, however, that if the fund's aggregate net investment income and net realized capital gains are less than the amount of the distribution level, the difference will be distributed from the fund's assets and will constitute a return of the shareholder's capital. You should not draw any conclusions about the fund's investment performance from the amount of this distribution or from the terms of the fund's managed distribution plan.

The fund estimates that it has distributed more than its income and capital gains; therefore, a portion of your distribution may be a return of capital. A return of capital may occur, for example, when some or all of the money that you invested in the fund is paid back to you. A return of capital distribution does not necessarily reflect the fund's investment performance and should not be confused with 'yield' or 'income'.

The fund provided this estimate of the sources of the distributions:

### **Fund Risks**

An investment in a fund is subject to risk, including the risk of possible loss of principal. A fund's shares may be worth less upon their sale than what an investor paid for them. The options overlay strategy may not be successful in achieving its objective of increasing distributable income while limiting the risk of loss and, in periods of significant moves in the S&P 500® Index, has resulted in and, in the future, may result in, losses for investors. Shares of closed-end funds may trade at a discount to their net asset value. For more information about each fund's investment objective and risks, please see the fund's annual report. A copy of the fund's most recent annual report may be obtained free of charge by contacting "Shareholder Services" as set forth at the end of this press release.
